

Grass Trimming Checklist

Grass cutting is usually at 9 am on Fridays, but you will be notified if changed.

The contractor provides two gas-powered grass trimmers.

Wear eye protection (sunglasses will do) and work gloves. Wearing old pants and shoes or high rubber boots is also recommended because grass clippings will cover your lower legs.

The work takes about 30 minutes per person.

Worker 1:

- Both sides of runway fence; careful with fence posts and bottom of fence.
- About 6 inches around sun disc holes.
- Starting restraints and patio stones
- Jet starting pads between patio stones
- Curbs around setup tables and sidewalk
- Both sides of green fence
- Around large shelter

Worker 2:

- Around trailer, patio, and summer shelter area
- Ends of culvert beside large shelter
- Both sides of ditches and around culverts from trailer to monument
- Both sides of ditches and around culverts on parking lot side.
- Around toilet area
- Around posts and rocks at driveway entrance

Other work: move set up tables, picnic tables, chairs, benches, jet exhaust deflector and helicopter landing pad out of the way for grass cutting and back to their spot afterwards.

Thank you for helping!
